Internships

Web Development Intern – Elevate Labs **May 2025 – Jun 2025**

- Delivered full-stack web features during a **6-week internship** using HTML, CSS, JavaScript, REST APIs, Git, and deployment tools.
- Enhanced responsive UI components across **3+ web pages** to improve usability and application flow.
- Collaborated in **4 Agile stages**: debugging, testing, code reviews, and deployment.
- Earned **1 Best Performer award** for consistent delivery, task completion, and technical contribution.

Research Intern – Justice-GPT Project, SRM University **Jun 2025 – Aug 2025**
GitHub Repository

- Contributed to an AI legal assistant during an **8-week research internship** focused on IPC section mapping.
- Designed responsive frontend components with React.js, Tailwind CSS, and JavaScript for **3 user-facing workflows**.
- Integrated Gemini API to generate **structured AI-based responses** from user crime descriptions.
- Optimized **3 areas**: API handling, AI workflow design, and frontend implementation.

Python Development Intern – CodexIntern **Sep 2025 – Oct 2025**

- Completed Python programming tasks during a **4-week internship** focused on logic building and application development.
- Applied **3 core concepts**: Object-Oriented Programming, Data Structures, and File Handling.
- Strengthened **3 coding practices**: debugging, modular coding, and clean software development.

Projects

Justice GPT – AI Legal Assistant GitHub

- Created an AI legal assistant that predicts IPC sections from user-provided crime descriptions.
- Developed frontend screens using React.js, Tailwind CSS, and JavaScript.
- Connected Gemini API for AI-based legal response generation and structured outputs.

Crop Disease Detection – Deep Learning GitHub

- Trained a deep learning model to detect crop diseases from plant leaf images.
- Used Python, CNN, image processing, and model training techniques.
- Performed dataset preprocessing, classification, and model evaluation.

Smart Home Automation System GitHub

- Created a voice-controlled smart home automation system for appliance control.
- Programmed command-based workflows using Python, JavaScript, and speech recognition.
- Enabled real-time automation logic for user commands and appliance actions.

Smart Grievance Management System GitHub
React.js, Node.js, AWS Lambda, DynamoDB, API Gateway, Amazon Cognito, Amazon S3

- Designed a grievance platform for complaint registration, tracking, and management.
- Built frontend features with React.js and backend logic with Node.js.
- Configured cloud services for authentication, storage, API handling, and backend processing.

Skills

Languages	C, C++, Python, Java, JavaScript, TypeScript, SQL, HTML, CSS
Frameworks	React.js, Node.js, Express.js, Flask, Tailwind CSS

Education

2023 – 2027	B.Tech in Computer Science and Engineering, **SRM University-AP**	CGPA: 8.18
2023	Class 12, Bhashyam Junior College	87%
2021	Class 10, Sri Venkateswara Balakuteer	81%

Certifications

- Java SE 17 Developer
- AWS Cloud Practitioner
